BIKE TOOL

BIKE COVERS

1. **Remove the bike cover from storage bag and fully unfold.**
2. **Place the front end of the bike cover over the bike handlebars and front wheel.**
3. **Pull cover down over the back of bike, including rear wheel for complete coverage.**
4. **Centre and straighten the top cover materials over bike. Ensure red reflective loops are positioned on either side of handlebars.**
5. **Adjust front and rear toggles for a tight wheel fit.**
6. **Connect and tighten buckle on the bottom of cover.**
7. **FOR THE XXL COVER ONLY:** Separate adjustable buckle strap supplied to secure the bike cover across the main body of bikes.
8. **Optional Insert lock or chain through front lock holes to secure bike.**

CLEANING

Do not machine wash or tumble dry. If you need to clean the bike cover, use a sponge and warm water with a light detergent to wipe clean. Do not use a strong detergent as this can potentially damage the water-resistant coating.

SUN CARE

The bike cover fabric provides great UV protection, but for maximum performance and long-standing wear, try and avoid extended exposure to direct sunlight, especially in the summer. We recommend regular rotation of the bike cover to maximise longevity.
