BIKE TOOL

BOTTLE CAGES

1. **Remove bolts:** If using bolts provided with your bike - Remove bolts: unscrew the bolts from the frame. Ensure the threads on the mounting rivets are clean of debris, paint and metal chips.
2. **Line up the bottle cage:** Place the bottle cage on the frame with mounting holes lined up with the mounting rivets on the frame.
3. **Installing bolts:** Put a light layer of grease on the bottle cage bolt threads. While holding the bottle cage in proper position, hand-tighten the bolts into the mounting rivets. Be careful not to cross-thread the bottle cage bolts.
4. **Tighten:** Tighten the bolts with a 4mm Allen Wrench.

Note: The bottle cage holds a standard size water bottle: 2.875 inches / 7.3cm in diameter and an indentation 5 inches from the bottom of the water bottle. Depending on the type of water bottle being used, the bottle cage can be adjusted by +/- 0.2 inches / 0.5 cm.
